Patent No. 5300436
GENERAL INFORMATION:
APPLICANT: GOLDSTEIN, Menek
APPLICANT: WIL, Jing
APPLICANT: FILER, David
APPLICANT: FILER, David
APPLICANT: FILER, GENETICALLY
TITLE OF INVENTION: GENETICALLY
TITLE OF INVENTION: HYDROXYLASE AND US
TITLE OF INVENTION: HYDROXYLASE AND US
TORRESPONDENCE ADDRESS:
ADDRESSEE: BROWDY and NEIMARK
STREET: 419 Seventh Street, N.W., Su
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IEM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOPTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/009,075
FILLING DATE: 19930126
FILLING DATE: 19930126
CLASSIFICATION NUMBER: US/08/009,075
REGISTRATION NUMBER: 34,033
REFERENCE/DOCKST NUMBER: GOLDSTEIN=1A
REGISTRATION NUMBER: 34,033
REFERENCE/DOCKST NUMBER: GOLDSTEIN=1A
TELECOMMUNICATION INFORMATION:
TELEPHONE: 202-628-5197
INFORMATION FOR SEQ ID NO: 5:
SEQUENCE CHARACTERISTICS:
LENGTH: 498 amino acids
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Ś
